

HIMANSHU SINGH

Software Engineering Intern | Backend Developer | Java & Spring Boot | RESTful APIs
+91 7253089179 | himanshusingh00924@gmail.com | linkedin.com/in/himanshusingh-00924h | github.com/HimanshuSingh924

PROFILE SUMMARY

MCA – Integrated (2026) candidate with strong hands-on experience in Core Java, Spring Boot, and RESTful API development. Designed and delivered 3+ backend solutions following complete SDLC practices — including design, development, testing, defect fixing, and documentation. Published an open-source Java library on JitPack, demonstrating ability to build and ship production-ready software. Quick learner with solid problem-solving skills, committed to writing clean and maintainable code. Willing to relocate.

EDUCATION

Raja Balwant Singh Management Technical Campus, Agra, UP June 2026
Master of Computer Applications (Integrated) | CGPA: 7.2 / 10 (approx. 72%)

TECHNICAL SKILLS

Languages	Java 8+, SQL
Frameworks	Spring Boot, Spring Core, Spring MVC, Spring Data JPA, Hibernate
Databases	Oracle, MySQL, MongoDB
Tools	Git, GitHub, Maven, Gradle, JUnit, Mockito
Others	JDBC, Servlets, JSP, JavaFX, HTML/CSS, Tailwind CSS
Concepts	RESTful APIs, SDLC, OOP, MVC Architecture, Role-Based Access Control
Familiar	C/C++, Python

DATA STRUCTURES & ALGORITHMS

Topics: Arrays, Strings, Linked List, Stack, Queue, Hashing

Algorithms: Sorting, Searching, Binary Search, Basic Dynamic Programming

- Solved 100+ LeetCode problems using Java, strengthening problem-solving and DSA skills.
- LeetCode Profile: leetcode.com/u/HimanshuSingh924/
- GitHub Repository: github.com/HimanshuSingh924/DSA

PROJECTS

JWT Auth Starter — Custom Spring Boot Library Mar – Apr 2026

Java 17 | Spring Boot 3.3 | Spring Security 6 | JJWT 0.12.5 | Maven | [GitHub](https://github.com) | [JitPack](https://jitpack.io)

- Developed and published a Spring Boot Starter on JitPack providing **auto-configured JWT-based authentication & authorization** via a single Maven dependency.
- Implemented a custom request filter to intercept and validate JWT Bearer tokens on every API call, securing all endpoints and eliminating 300+ lines of repeated security boilerplate.
- Used `@ConditionalOnMissingBean` to ensure **zero-conflict modular integration**, following Spring Boot auto-configuration best practices.
- Exposed configurable properties using `@ConfigurationProperties` with validation support, enabling easy customization of token expiry, secret key, and public endpoints with IDE autocomplete.

BillGen Utility – Billing & Invoice System

May – June 2025

Java 8 | Java Swing | JDBC | Oracle DB | iText API

- Developed secure **user authentication** (Login/Signup) and an admin dashboard.
- Managed **100+ customer billing records** with meter number-based tracking using Oracle DB.
- Automated invoice generation using **iText API**, reducing manual billing effort significantly.

EmpTrack WebApp – Employee Management System

Nov – Dec 2025

Java 8 | Servlet | JSP | JDBC | HTML/CSS | Oracle DB

- Implemented **CRUD operations** on **200+ employee records** with persistent Oracle DB storage, ensuring data integrity throughout.
- Followed a full **SDLC workflow** requirements analysis, MVC architecture design, development, debugging, and testing.
- Built role-based access control (Admin/User) with modular Servlet controllers.
- Applied MVC-style separation between JSP front-end and backend logic, improving maintainability and **software quality**.

CERTIFICATIONS & ACHIEVEMENTS

HackerRank Java (Basic) Certified – Credential ID: 8bd9ba04b3d4 | 2024

HackerRank Java Silver Badge – 156.64 points earned through competitive coding challenges | 2024
